

A unique partner for every step of your project!

SWARM INTELLIGENCE-HUB™

THE NEW AGRI-INDUSTRIAL BUSINESS CONCEPT THAT COMBINES MANKIND AND ENVIRONMENT FOR A SUSTAINABLE AND PROSPEROUS FUTURE.

TRANSFORMATION IMPACT

Each successful project must have solid roots intertwined with the local economic fabric.

AGRI-INDUSTRIAL HUB

New concept of cooperative business in which single resources work together to maximize profits and optimize costs.

COOPERATION BETWEEN AGRI-CULTURISTS

The transformation process starts from the collection...supply of the raw material in a "Just-in-Time" way.

OUTGROWERS & MICRO-FARMS

Thanks to the new micro-farms, agreed visions bring to the growth of the entire supply chain as well as its spread in a short period of time.

SUPPLY CHAIN ANALYSIS

A 360° evaluation of the productive supply chain, in order to define the keystone, i.e., the leaders of the entire business project.

We always thought that an **«Ethical and sustainable business»** could be the key to success for a «profitable business» both on medium and short term.

International institutions and governments are more and more focused on a consistent contribution for the development of projects that involves social and economical aspects for the rest of the chain and local population which sustains it too.

Cooperation through our **«SWARM INTELLIGENCE-HUB™»** concept will allow you to «optimize costs» and **«increase profit»**

Technical assistance of our experts in the agri-food and technological field will give you a guideline for the hub creation.

That particular approach of new conception will have a relevant and useful impact on the local population.

We are your partner with whom make grow your business

ORION ENGINEERING S.R.L. company was founded after over 30 years of partnerships with national and international market's best Food Processing players.

We specialized on the development of **«tailor-made» solutions** for agri-food prototypes and installations for small and middle production.

ORION ENGINEERING S.R.L. can count on a multidisciplinary team qualified on different lateral skills. The daily effort, together with a constant activity of research and development, marked the company's worldwide success.
