

**ORION**  
ENGINEERING  
*Food Technologies & Services*

*A unique partner for every step of your project!*

**NEPTUNO i-12 Series**  
MULTI-PURPOSE TRANSPORTABLE PRODUCTION UNITS

**ORION ENGINEERING SRL** provide high-quality, bespoke fruit processing plants capable of processing a large variety of crops. **From mangoes to tomatoes, papaya to apples, whether you're drying, juicing, or sterilising** – we're sure we have the solution for your processing needs!

Our specialist Engineers carefully design each fruit processing plant to meet your exact specifications, then we manufacture your machines at our on-site factory to the highest quality.

Available as a mobile version, our fruit juicing plants offer washing, milling, blending, and pasteurising.

With a “**Neptuno i-12.X**” module the only thing the customer has to worry about is to provide the support points on the ground and the utilities in a single point (water, electrical power and a possible drainage point). All this guided by the information provided by our technical staff. The modules are scalable and can be interconnected to increase production capacity. They are also configured to comply with international health standards.

## We are your partner with whom make grow your business

**ORION ENGINEERING S.R.L.** company was founded after over 30 years of partnerships with national and international market's best Food Processing players.

We specialized on the development of **«tailor-made» solutions** for agri-food prototypes and installations for small and middle production.

**ORION ENGINEERING S.R.L.** can count on a multidisciplinary team qualified on different lateral skills. The daily effort, together with a constant activity of research and development, marked the company's worldwide success.
